or any business firm in Williamsburg.

TO OUR CUSTOMERS.

We would say to those unacquainted with us that this Nursery was established in 1897 and since that time has been under the same management. The stock of trees, plants and vines offered in this list is in most thrifty condition and first-class in every respect.

We are not unmindful of the many friends whose patronage and friendship so greatly assisted us; we thank them for favors shown us and assure them as well as others, whom we trust will become our patrons, that our stock is now better than ever.

Our office has been greatly enlarged and our force both in the office and on the grounds is better equipped for handling a large business.

We have adopted new and up-to-date methods of digging, billing out, packing, etc., and are confident we can get all orders out in good condition.

Our stock will be billed out and packed under cover, so customers may rely upon receiving stock in prime condition. We call your attention to the new varieties of fruits, some of which will be valuable.

The above cut represents the Diploma awarded F. O. Harrington on apples at the Paris Exposition in 1900. Our scions are cut mainly from his orchards, and customers can depend on getting trees that will fruit and produce varieties wanted.

We use only the short piece root graft for apples which makes the best trees for Iowa planters.

Guarantee of Genuineness.

While we exercise the greatest diligence and care to have stock true to label, it is mutually agreed between ourselves and the purchaser that our guarantee shall in no case make us liable for any sum greater than price originally charged for stock that proves untrue.

Send in your orders early. Don't wait until the last day. We may be short on the varieties wanted.

Terms of Payment.

Cash, unless specially agreed otherwise. Six per cent interest charged on all accounts not paid in 30 days. Prices are net. Boxing and bailing extra.

Plants furnished as follows: 50 at 100 rates, 500 at 1,000.

Location.

On the C. M. & St. P. R. R, about half way between Cedar Rapids and Ottumwa. Office and packing house forty rods from depot.

Telephone.

Local Telephone in Office - - No. 16

STATE OF IOWA.
Certificate of Nursery Inspection.

THIS IS TO CERTIFY, That the Growing Nursery Stock and Premises of

H. Harrington & Co.,

situated in Williamsburg, County of Iowa, State of Iowa have been inspected according to the provisions of Chapter 53 of the Acts of the Twenty-seventh General Assembly, and that no indications have been fonnd of the presence of the San Jose scale or other dangerous insect or plant disease.

This certificate is invalid after June 1st, 1903.

Certificate No. 68.

H. E. SUMMERS,
State Entomologist.

Dated, 28th of August, 1902, Ames, Iowa.

York Imperial	Sheriff
Winesap	Ingram
Windsor*	Collins
No. Spy	Highfill
Oliver	Beach
Givins	Osceola

*All sold except limited stock, 2 to 3 feet.

JEFFERIS.—One of the good early varieties. The history of the Jefferis shows how long it often takes for a good apple to be generally known. It is a hard tree to grow in the nursery which may account for its slow introduction.

This is how we are able to get good roots.

LEIVLAND:—The finest early variety we have ever seen. Ripens with Yellow Transparent, but is a better apple to handle. Apples sold on this market at $1.00 per bushel when other summer apples were sold at thirty or forty cents.

We have this in two and one-year-old trees only and they are all sold except a few 2 to 3 foot. Over three thousand for next year's trade.

WINDSOR APPLE:—Originated in Wisconsin and grown in Iowa County for 16 years. You must try it to appreciate its value. Apple large, red, sub acid, season December to March. Am. Pom. Society reported it favorable where tried. Recommended for trial by Prof. H. C. Price, of Ames. Another year's fruiting of this splendid variety only strengthens our claims for it.

McINTOSH:—The original tree was discovered and saved with several other seedlings of about 10 or 15 years old, by John McIntosh, in clearing a building place in the present village of

Dundale, Ontario, Canada, about 1798. The original tree, over one hundred years old, is still fruiting. It did not reach the United States until after 1870.

Chas. Downing described it as "a good annual bearer of fair, handsome fruit of excellent quality and valuable for home use and market." It belongs to the Fameuse group and does well wherever tried. Season, six to eight weeks later than Fameuse.

VARIETIES CRABS.

Same price as apples.

The above cut shows a block of 20,000 th

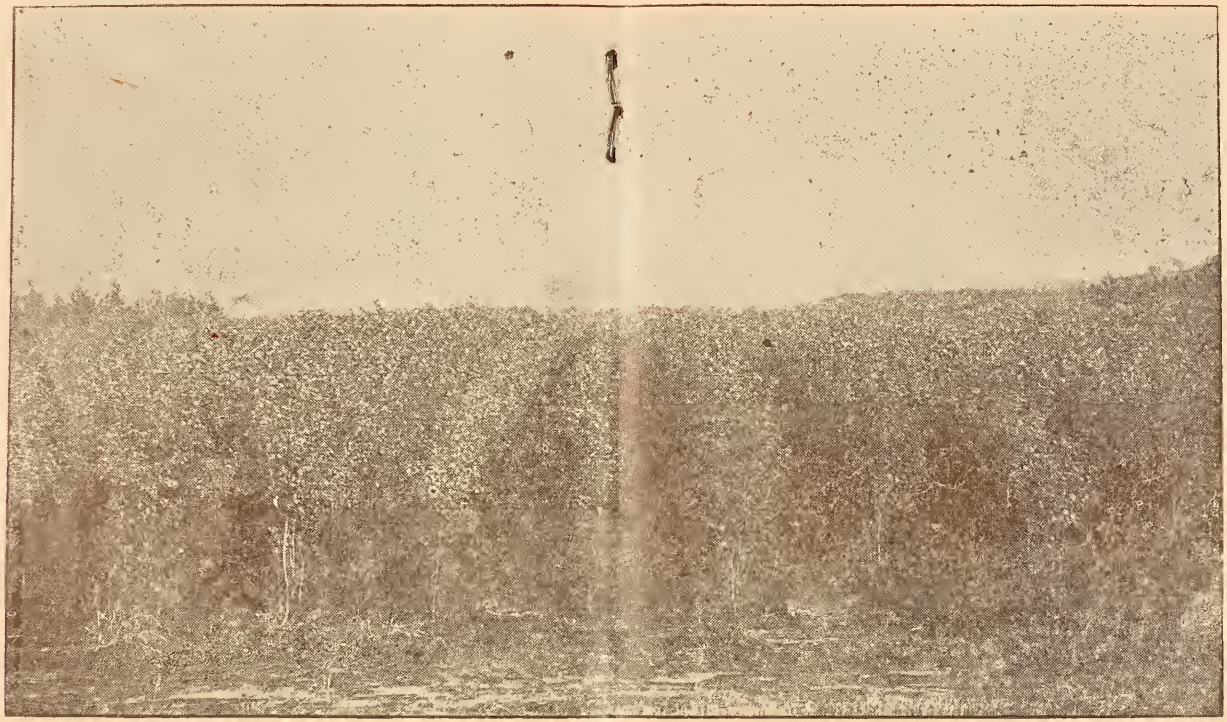
GOLD PLUM.—Introduced and propogated exclusively by Stark Bros., a plum that came through all the recent hard winters without injury to bud or root and produced loads of fruit in 1901. We consider it the finest thing canned yet tested and would recommend it to be planted for home use.

H. HARRINGTON & CO., WILLIAMSBURG, IOWA.

We promise you extra quality—not extra count.

Golden Rule we apply. We treat our customers as we like to be treated.

There are 365 day in each year when it is bad policy to buy trees of a stranger representing a firm whose reputation is not above reproach.



The above cut shows a block of 20,000 three year old apple, the best we have ever grown.

GOLD PLUM.—Introduced and propogated exclusively by Stark Bros., a plum that came through all the recent hard winters without injury to bud or root and produced loads of fruit in 1901. We consider it the finest thing canned yet tested and would recommend it to be planted for home use.

BEATTY PLUMS originated in Benton County and bears the name of its originator. Tree vigorous, upright grower, with the best of foliage. A true Americana. Fruit large to very large, beautifully colored; transparent yellow, blushed with red; combines more good qualities than any native plum yet produced; especially fine for canning as it develops no acid in cooking, and there is none better for dessert.

PEARS.

5–7 ft., ¾ and up.....each 30c, per 100 $25

Keiffer	Duchess
Garber	

PEACH.

5–6 ft.....each 20c, per 100 $15

Bailey	Bokara No. 3
Champion	Elberta
Fitzgerald	

Lone Tree 4–5 ft.....each 25c

THE LONE TREE PEACH originated from seed planted eighteen years ago, which has fruited on an average of two years out of three since. Fruit excellent in quality, medium size; the color a green background covered with yellow, with blush on one side. The only variety to fruit without protection the past season.

GOOSEBERRIES.

Houghton	each	5c,	per	100	$4.50
Champion	"	10c,	"	"	$7.00
Downing	"	"	"	"	$6.00
Pearl	"	"	"	"	$7.50

PEARL GOOSEBERRY.—This desirable variety is a cross between Houghton and one of the largest English varieties. It is hardy, free from mildew, and taking into consideration size, quality and productiveness, ought to be just what you are looking for.

CURRANTS.
